

## Placing Your Order for Custom Chaps In 4 Easy Steps

**STEP 1.** Let's start with measurements. If we do not have your current measurements on file, we will need new measurements. You can find our chap measure chart and chap measuring video at <http://woodswestern.com/measuring-chart>

**STEP 2.** Choose the type of leather, the color, your chap silver, and any special yokes or extra details you would like, such as studs, or crystals.

**STEP 3.** Send us your measure chart with your chap choices, we will go over the measurements to see if there are any that need to be double checked, and send out any leather color samples that may be required.

**STEP 4.** Finally, once measurements have been approved and we have received approval from you on your leather choice, a 50% deposit is charged, and we begin constructing your chaps. The remaining balance plus shipping is charged when your chaps are complete and being shipped.

Custom chaps generally take 4 weeks from the date the deposit is charged, however, that time frame is subject to change, so please let us know if you have a specific date that you need your chaps by.

If you need chaps in a hurry, we do carry some ready to wear black top grain and pig suede chaps in stock, give us a call and we will check to see if we have your size available. We will need your chap waist, thigh, and inseam measurements to check for ready to wear chaps in your size.
